

Research Dept. Report for Sept. 19, 2015

During the past 2 months, we received 4 research requests and they were all taken care of by last week. These are the first we have had in some months. It is not particularly encouraging for our research volunteers to come in and find nothing to work on that they donate their time for. We do help clients and some of us have other duties other than research so they can keep busy. I hope with the winter coming that we will get some business as we don't want to lose researchers for lack of work.

It should be noted that we do get positive feed-back from the clients we have done work for.

Respectively submitted,
Jim Rutherford
Chairman Research Committee.
